

FLOOR CARE

Only a Dyson works like a Dyson

Core technologies in every Dyson cord-free stick vacuum

Multi-stage filtration

Dyson's fully-sealed filtration traps microscopic particles and allergens – and expels cleaner air.

Dyson Hyperdymium™ motor

Powerful, lightweight digital motor helps suck up microscopic dust and large debris.

Carbon fibre filaments

Dyson uses black anti-static carbon fibre filaments to extract fine dust from hard floors.

Radial Root Cyclone™ technology

Dyson's patented cyclones capture dust and debris from the airflow, so there's no loss of suction.

Energy-dense battery

Long-lasting, fade-free power to clean here, there and everywhere around your home.

dyson v8

Powerful, versatile and low noise. With de-tangling technology.

Engineered for homes with pets.

Charger

Easily reaches up high
Lightweight and ergonomic to clean high-up places with one smooth motion.

Mini motorised tool
Motorised brush bar, concentrated in a smaller head to remove stubborn dirt from mattresses, upholstery and stairs.

No-touch bin emptying
Hygienic ejection mechanism drives out dirt and dust in one action – so you don't need to touch it.

Crevice tool
Engineered for precise cleaning around tricky edges and into hard-to-reach narrow spaces.

Low-reach adaptor
Bends to comfortably reach down low. Engineered to clean further under low furniture by adjusting the wand angle up to 90°.

Transforms to a handheld
Small enough for hard-to-reach places around your home. Powerful and long-lasting enough to clean your whole car too.

dyson v11

Captures hidden dust that traditional cleaning leaves behind

Captures 99.99% of particles as small as 0.3 microns¹.

Specifications

Suction Power	Bin volume
Up to 185AW	0.77L
Run time	Weight
60 mins	2.9kg

¹Filtration tested against ASTM F1977-04, tested in Boost mode by independent third-party laboratory, SGS – IBR Laboratories US.

Intelligently reports in real time
Monitors system performance 8,000 times a second, then reports in real time on the LCD screen.

The right cleaning mode for the right task
Three cleaning modes optimised for a variety of tasks. The right balance of power and run time, where you need it.

Powerful cleaning on floors and carpets
An integrated digital motor spins the brush bar up to 60 times a second. It drives stiff nylon bristles deep into carpet to remove dirt, while carbon fiber filaments capture fine dust on hard floors.

Click-in battery pack
Remove and replace at the press of a button for even longer cleans.¹ Click-in batteries can be charged on or off the machine.

Radial Root Cyclone™ technology
14 cyclones generate forces of 79,000g to fling dust into the bin without clogging the filter, so there's no loss of suction.

Advanced whole-machine filtration
Dyson's fully-sealed, six-layer filtration system traps 99.7% of particles as small as 0.3 microns.²

dyson v12 detect slim absolute

Laser Slim Fluffy™ cleaner head
25cm-wide cleaner head engineered with soft nylon and anti-static carbon fibre filaments to remove dust from hard floors and narrower gaps. With a low profile to reach further under furniture.

Direct drive cleaner head deep cleans all floors
Nylon bristles drive dirt from carpet. Black anti-static carbon fibre filaments extract dust from hard floors.

Hair screw tool. Picks up long hair and pet hair. Fast.
Anti-tangle conical brush bar spirals hair off and into the bin. Motor-driven cleaning for small spaces.

Single-button power control
No need to hold the trigger. You can swap hands while navigating obstacles, making cleaning easier.

No-touch bin emptying
Hygienic ejection mechanism drives dust and debris deep into your bin, in one action.

Easy to maintain
The filter and Fluffy™ brush bar can be washed, and the bin and tools wiped clean, to remove dust build-up and help optimise your Dyson vacuum's performance.⁷

dyson v12s detect slim submarine

Washes. Reveals.

Detangles.

All in one vacuum.

Removes spills and tough stains.

Reveals 2x more invisible dust.¹

Captures hair without tangling.

Single-button power control
No need to hold the trigger. You can swap hands while navigating obstacles, making cleaning easier.

Click-in battery
Remove and replace at the press of a button to double your run time.⁷

Easy clean wet roller head
Wet roller can be washed with household anti-bacterial detergents diluted to recommended ratio.

Drip tray
Collects any water droplets and stores your Dyson Submarine™ wet roller head.

No-touch bin emptying
Hygienic ejection mechanism drives dust and debris deep into your bin, in one action.

Washable parts
The filter and Fluffy™ brush bar can both be washed to remove dust build-up and optimise performance.

Docking station
Drops into the wall-mounted charging dock, ready for your next clean.

Compact and manoeuvrable
Low-profile cleaner head helps you reach under furniture and into tight spaces.

Laser Slim Fluffy™ cleaner head
25cm-wide cleaner head engineered with soft nylon and anti-static carbon fibre filaments to remove dust from hard floors and narrower gaps. With a low profile to reach further under furniture.

Automatically deep cleans carpets
In Auto mode, Dyson DLS™ technology inside the High Torque cleaner head monitors brush bar resistance 360 times a second, intelligently adapting power across different floor types.⁷

Hair screw tool. Picks up long hair and pet hair. Fast.
Anti-tangle conical brush bar spirals hair off and into the bin. Motor-driven cleaning for small spaces.

Easy to maintain
The filter and Fluffy™ brush bar can be washed, and the bin and tools wiped clean, to remove dust build-up and help optimise your Dyson vacuum's performance.⁷

No-touch bin emptying
Hygienic ejection mechanism drives dust and debris deep into your bin, in one action.

Digital Motorbar™ Cleaner head with anti-tangle technology
Powerfully sucks up dust and hair from all floors. De-tangling comb automatically clears hair from the brush bar.

Dyson cord-free stick vacuums

All Dyson cord-free vacuums are designed to deep clean across multiple surfaces.

The tools listed below help you deep clean hard floors, carpets, sofas, mattresses, irrespective of whichever model you choose:

Air Purifiers

dyson purifier

Automatically clean a whole room properly, capturing 99.95% of potentially harmful pollutants as small as 0.1 microns.

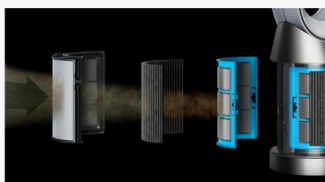

Key Features

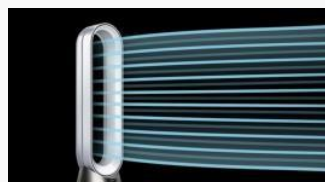

Senses

Automatically detects airborne particles and gases, then diagnoses and reports them in real time.

Captures

Activated carbon filters remove gases. Sealed HEPA filters capture 99.95% of ultrafine particles such as allergens and pollutants.

Projects

The new Dyson air purifiers have Air Multiplier™ technology and 350° oscillation, to project air around the whole room

Fully sealed to HEPA H13

In our latest air purifiers, it's not just the filter that meets HEPA H13 standard, it's the whole machine. So what goes inside, stays inside.

Additional Features and Accreditations

Diffused mode

Purifies without cooling you

Now 20% quieter

Acoustically engineered to reduce turbulence, so it's 20% quieter than the previous model.

Remote Control

Curved and magnetized to store neatly on top of the machine.

Voice Control

Control it hands free with compatible voice services

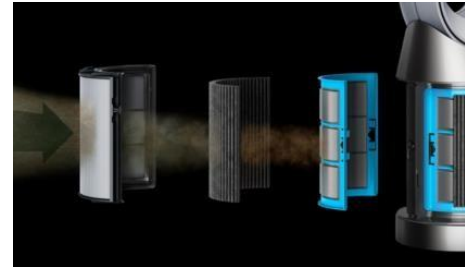

* TP07 & HP07 available in 2 color options (White/Silver and Black/Nickel)

Dyson Purifier Cool Gen1 (White/White)

Senses pollutants in real time

The only air purifier that senses and reports 4 different pollutants - PM2.5, PM10- in real time.⁵

Captures pollutants with 360° sealed filters

The vacuum-sealed filter system combines an activated carbon filter to remove gases, and a H-13 Glass HEPA filter that captures 99.95% of microscopic allergens and pollutants as small as 0.1 microns.¹

Captures gases and ultrafine particles

The HEPA H13 filter captures 99.95% of particles as small as 0.1 microns, while a layer of activated carbon removes odours and gases including VOCs.³

Quick and easy filter changing

Low maintenance, easily changeable filters. With built-in notification when they require replacing.

Projects powerful airflow

Only Dyson air purifiers have Air Multiplier™ technology and 350° oscillation, delivering over 360 litres per second of airflow – circulating purified air throughout the whole room.^{2, 5}

Oscillates up to 350 degrees

Adjustable oscillation angle from 45° to 350°, to help project purified air around the whole room.

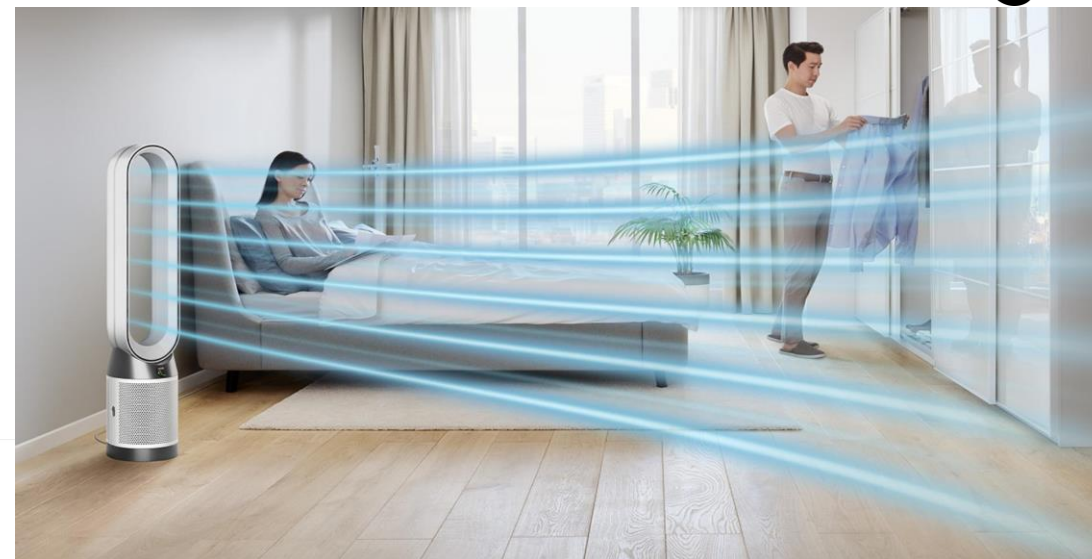

Whole-room purification

Air Multiplier™ technology generates the circulation to purify the whole room.¹

Removes airborne pollutants

HEPA and activated carbon filtration removes 99.95% of particles as small as 0.1 microns.³

Cools you in summer

A powerful stream of purified airflow cools you during warmer weather.

Night mode

Operates quietly to monitor and purify your room while you sleep.

dyson purifier cool formaldehyde

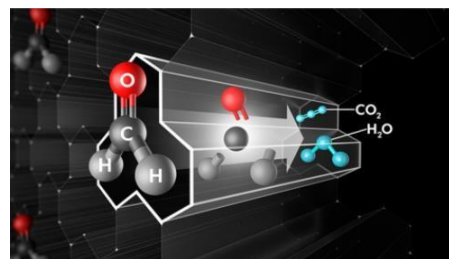

Senses pollutants in real time

The only air purifier that senses and reports 4 different pollutants - PM2.5, PM10, VOCs, NO2 - in real time.

Captures pollutants with 360° sealed filters

The vacuum-sealed filter system combines an activated carbon filter to remove gases, and a H-13 Glass HEPA filter that captures 99.95% of microscopic allergens and pollutants as small as 0.1 microns.

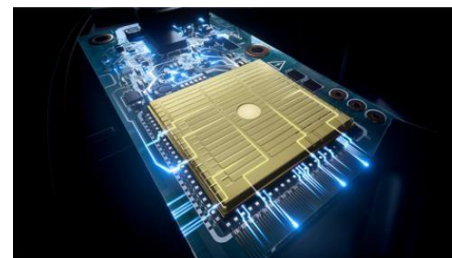

Destroys formaldehyde, continuously

The Dyson catalytic filter continuously traps and breaks down formaldehyde molecules into water and CO2. And it never needs replacing

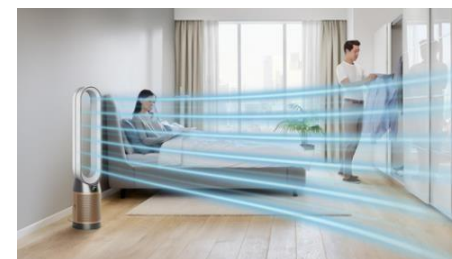

Diffused mode

Diverts airflow through the back of the machine. To purify, without cooling you.

Precisely detects formaldehyde

Our latest air purifiers use a solid-state sensor to detect formaldehyde molecules – 500 times smaller than 0.1 microns. Maintains precision for the lifetime of the machine.

Now 20% quieter

Acoustically engineered to reduce turbulence, so it's 20% quieter than the previous model..

Dyson Purifier Big + Quiet

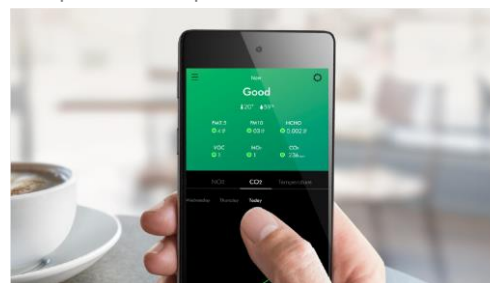

Senses pollutants in real time

The only air purifier that senses and reports 4 different pollutants - PM2.5, PM10, VOCs, NO2 - in real time.⁵

Quiet, even at full power

An acoustically engineered motor bucket records just 56dBA of sound power at full-speed. With no compromise on performance.

Control your air quality wherever you are

The MyDyson™ app gives you autonomy over your air quality. View which particles have been captured, set schedules, browse reports, and more.⁸

Hygienic filter replacement

Low maintenance, A hygienic replacement mechanism allows you to dispose of the HEPA filter in one click.

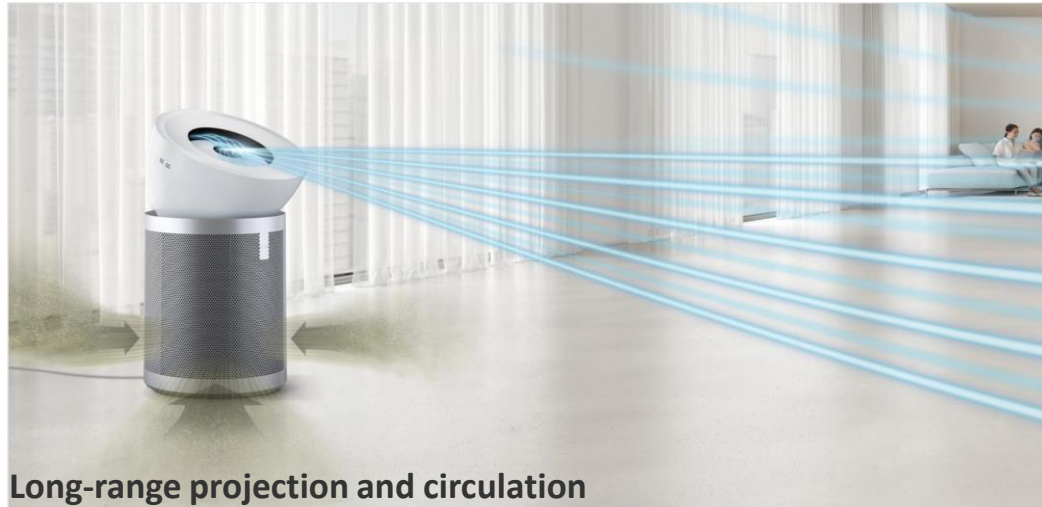

Projects powerful airflow

Only Dyson air purifiers have Air Multiplier™ technology and 350° oscillation, delivering over 360 litres per second of airflow – circulating purified air throughout the whole room.^{2, 5}

Oscillates up to 350 degrees

Adjustable oscillation angle from 45° to 350°, to help project purified air around the whole room.

Long-range projection and circulation

Our latest purifier uses cone aerodynamics to deliver powerful, long-range projection – circulating air & driving even distant pollutants back through sealed filters. For whole-room purification, even in large spaces.¹

Adjust your airflow

Adjust the angle of airflow at 0°, 25° or 50°, or mimic the feeling of refreshing air indoors using Breeze mode.

Quiet, even at full power

An acoustically engineered motor bucket records just 56dBA of sound power at full-speed. With no compromise on performance.

Smart home purification

Connect and then control your air quality, hands-free, with compatible smart home voice services.¹³
